

Huyton
Asphalt

ULTICOLOUR

ULTICOLOUR is a range of coloured asphalts that combine a clear polymer modified binder, selected pigment and complementary aggregate, for vibrant, long lasting coloured asphalt surfaces.

Available as a 6mm and 10mm size SMA surface course for a wide range of applications from playgrounds and office developments to bus lanes.

Also available on request as a coloured porous asphalt for improved drainage, a hot rolled asphalt (HRA) and as pre-coated chippings.

Certain colours can also be supplied with high PSV aggregate for lasting texture in highly trafficked locations.

Buff Quartzite

Dalton Grange

Natural Quartzite

New Brighton Promenade

Leaf Green

Croxteth Primary

White

Gateacre School

A close-up photograph of buff gravel, showing a mix of light-colored stones and a fine, light-colored sand or silt matrix.
